New Updates to the Parent Portal

USD would like to announce new updates to the Parent Portal, soon to be the MyUSDStudent Portal, which will replace current access to your student’s USD online information in late-May 2014.

Enhancements of the new USD Parent Portal include:

- Outgoing emails will be generated by the new system which enables USD to communicate directly with parents.
- Family Education Right to Privacy Act (FERPA) will be authorized when your student gives you access to the new Parent Portal. This authorization allows USD staff and faculty to talk to a parent about the student’s information. This new step eliminates the second FERPA form the Registrar’s Office previously facilitated. Please encourage your student to complete the FERPA authorization.
- USD Parents will now have the ability to reset their own password at any time.
- A seamless sign-on between USD Parent Portal and CASHNet, the billing and payment system allows parents to sign-in using one login and password.

If you already have access to the USD Parent Portal, your access should be uninterrupted. However, please note that the web address, your login credentials and the appearance of this site will change.

- Please bookmark the new USD Parent Portal location https://MyUSDStudent.sandiego.edu
- Your login credentials will change. Your username will no longer begin with the letter “P” followed by eight numbers. Instead, you will now login using the email address associated with your Parent Portal account.
- A system generated email with your username and temporary password will be sent to your email address after the conversion.
- The first time you access the new USD Parent Portal, you will be asked to update the temporary password to a new password.
- The system will also require you to provide a mailing address.
- After the initial setup, you will not need to repeat these setups.
